Bay Area, CA

Experience

Zalor AI

Co-founder & CEO

Sep 2025 – Present

- Defined and built an AI agent testing platform that uses AI agents to simulate real user personas, detect regressions, and ensure reliability before deployment
- Secured 4 paying customers, validating pre-deployment reliability as a critical pain point in AI agent adoption
- Conducted 45+ customer interviews across startups and enterprise teams to define product strategy and positioning against well-funded competitors
- Shipped an MVP in 3 weeks, going from concept to customer demo

ServiceNow

Aug 2024 – Present

Software Engineer II, AI Control Tower (Promoted Feb 2026)

- Led product strategy and development of LangGraph and CrewAI connectors, presenting to leadership and managing a team of senior engineers to ship to production
- Built AI agent observability infrastructure across AWS AgentCore, GCP Vertex AI, and Azure AI Foundry, driving 4x growth in quarterly deal volume for AI Control Tower in 2025
- Identified customer deployment patterns, drove a shift to cloud-based AI agent deployments, and led demos for VP-level leadership and enterprise customers
- Led implementation and launch of the AI-Native UI for the Trace Collector application; presented to 500 employees ahead of release

Software Engineer, Mobile Platform

Aug 2024 – Aug 2025

- Owned end-to-end feature development for Mobile App Builder across 800+ customer instances, defining feature requirements and building theming, accessibility, and shared component architecture
- Delivered platform improvements supporting 60% year-over-year adoption growth and 1,400+ monthly active users

Software Engineering Intern

May 2023 – Aug 2023

- Won 1st place out of 500+ participants at ServiceNow's Engineering Hackathon; built an intelligent code editor shipped to production and used by thousands of ServiceNow customers daily

Projects

Managed MCP Platform

Sep 2025 – Jan 2026

- Built a platform that generates and hosts Model Context Protocol (MCP) servers from OpenAPI specs, enabling businesses to connect applications to AI assistants like Claude and ChatGPT
- Conducted 20+ customer conversations with companies including Monday.com, Outreach, and Kubera; secured Weav.ai as a design partner
- Identified stronger demand for AI agent reliability and testing through customer conversations, driving a pivot to agent evaluation infrastructure

Skills

Product: Product strategy, roadmap prioritization, customer discovery, user research, competitive positioning, go-to-market, experiment design, agile, scrum

Technical: TypeScript, JavaScript, Python, SQL, React, Docker, Kubernetes, LangGraph, CrewAI, LangSmith, Langfuse, OpenAI Agents SDK, OpenTelemetry, AWS, GCP, Azure

Education

University of Michigan

Graduated 2024

B.S. Computer Science, GPA: 3.72
